

Higher Security For At Risk Persons

Blanket Size: 195*135cm
Weight: 2.85kg

Fire Risk Reduced

- Permanently fire resistant materials used throughout
- Tested to fire standard BS 5815 Part 3 (source 5)
- Self extinguishing fabrics.
- Fire resistance will not reduce with age or use.

New Technology

- Fabrics strongly bonded by ultra sonic welding.
- 95% less thread to be unpicked.
- 95% less needle holes giving more strength, less liquid penetration, and better hygiene
- Greatly improved safety.

Stronger, Simpler Hem

- Inverted double hem captures fabric edges in multiple lines of locked stitching.
- Extremely difficult to open.
- Hem reinforced by eight layers of fabric.
- Rip resistant.
- Rounded corners.
- Meets tear strength test BS EN ISO 13937-3 2000 Part 3

Safety With Comfort

- Cannot be rolled or twisted into a ligature.
- Reinforced against tear with rip-stop threads on 1cm grid.
- Fabrics bonded & welded together in 4 layers to prevent ripping.
- Provides comfort, warmth, good appearance, low weight plus greatly increased blanket life under demanding use.

High Durability

Permanent Label

- Printed directly onto blanket.
- Space for customer to add own code for traceability.
- No fade with washing.

Energy & Laundry Cost Savings

- Washable at low temperatures.
- 40% reduced drying time & cost.
- Reduced shrinkage after repeated washes even at high temperatures.
- Inherently fire retardant cannot be washed out.
- Improved durability allowing multiple wash cycles.
- Lower lifetime cost.

Soft Rounded Corners

- Increased safety.
- Prolonged blanket life.
- Softer appearance and feel.
- Less abrasion during wash.
